

One-piece Guedel airways

Safer by design

One-piece Guedel airways

Safer by design

By using the latest manufacturing technology Intersurgical has produced the first major breakthrough in Guedel airway design for thirty years.

Combining two materials with very different physical characteristics into one moulding, our One-piece design eliminates the separate bite block found in all conventional Guedel airways.

Loose or detached bite blocks constitute a real threat to patient safety and have been the subject of several hazard notices in the past. Our One-piece design overcomes all of the associated risks.

As well as improved safety, the One-piece Guedel airway also incorporates a soft tip reducing the risk of trauma to the patient. We also offer a sterile option, providing a further choice.

ISO 5364:2016 – Colour coding guidance

In the most recent version of ISO 5364:2016 Anaesthetic and Respiratory Equipment – Oropharyngeal Airways, a new colour coding requirement was implemented, aiming to improve patient safety and provide consistency across products from different manufacturers.

In order to comply with the colour coding system specified in ISO 5364:2016, it was necessary for Intersurgical to update four sizes of Guedels. The sizes that have changed are as follows:

- ISO size 3.5; from Pink to Light Green
- ISO size 6.5; from White to Brown
- ISO size 7.0; from Yellow to White
- ISO size 9.0; from Orange to Yellow

Each department will need to consider locally how this change will be implemented as it may take time for existing stock to be used.

The four sizes of Intersurgical Guedel airways that have had their colours changed to conform to the updated standard.

Product code	ISO size
1000035 (S*)	3.5
1100050 (S*)	5.0
1110055 (S*)	5.5
1111065 (S*)	6.5
1111570 (S*)	7.0
1112080 (S*)	8.0
1113090 (S*)	9.0
1114100 (S*)	10.0
1115120 (S*)	12.0

This colour change effects all of Intersurgical's Guedel Airway products, including bulk-packed options.

Softer tip

By continuing to prioritise patient safety, Intersurgical has further increased the softness of the tip of all Guedel airways.

Guedel airways that utilise hard and rigid materials at the tip represent a significant threat of causing trauma when inserted. By using an even softer material to form the tip of the One-piece Guedel airway, the potential to cause trauma to the patient's airway upon insertion is further reduced.

Code	Description	Size	ISO	Colour	Box Qty.	
1115120 (S*)	One-piece Guedel airway	5	12.0	Purple	70	
1114100 (S*)	One-piece Guedel airway	4	10.0	Red	90	
1113090 (S*)	One-piece Guedel airway	3	9.0	Yellow	90	
1112080 (S*)	One-piece Guedel airway	2	8.0	Green	100	
1111570 (S*)	One-piece Guedel airway	1.5	7.0	White	100	
1111065 (S*)	One-piece Guedel airway	1	6.5	Brown	20	
1110055 (S*)	One-piece Guedel airway	0	5.5	Grey	25	
1100050 (S*)	One-piece Guedel airway	00	5.0	Blue	25	
1000035 (S*)	One-piece Guedel airway	000	3.5	Light Green	25
